THE NEW EVOLUTION OF HFI WELDER

OPEN HOUSE 2019 - DISCOVER THE INNOVATIVE MOSWELD SiC

We welcome you at our headquarters in Leini (Turin) to present the innovative welding system with silicon carbide transistors.

For over five decades, **EMMEDI** has earned an outstanding reputation in the tube industry for reliability through superior technology and quality of design. The **EMMEDI** line of products is recognized worldwide as an industry leader with over 1000 global installations.

EMMEDI welders are installed throughout the world since the early 1960's. Our welders have earned a reputation for their reliable design and advanced engineering.

From vacuum tube welders to solid-state welders and now with the NEW SiC technology, **EMMEDI** is still leading technological advancements in the market. **EMMEDI** supplies a full line of products to the tube, pipe and wire industries.

With our affiliation within the **Ajax TOCCO** family of global companies, we now offer expanded global solutions with local parts and service capability.
