Donation to Fondazione Ricerca Molinette ONLUS – Bolstering of Laboratory management in the advanced phases of Sars-Cov2 at the City of Health and Science University Hospital of Turin

Torino, 15th June 2020

Dear Sirs,

With this letter I would like to thank you on behalf of Fondazione Ricerca Molinette ONLUS for having decided to support our Campaign “Insieme in Prima Linea” with a donation of 10.000 €.

In particular, your donation will be used to fund the **project directed to strengthen the Microbiology and Virology Laboratory** of the City of Health and Science University Hospital of Turin.

Coronavirus emergency has put in evidence the need to potentiate and optimize technological and logistics resources of the Laboratory in order to ensure a rapid and efficient diagnostic workflow.

During the phase 1 and pandemic peak, and in the current development of pandemics, the huge activity volume has determined the processing and storage of a very high number of clinical specimens on which it will be possible to conduct studies aimed to increase our knowledge of viral biological behavior and genetic characteristics.

The project aims at bolstering the equipment of the Laboratory in order to improve and speed up the researchers' work.
